

DAWSONS SECURE STORAGE

It is our recommendation that if a property is empty, or not secure, that items of significant value are removed from the property for safe keeping, ensuring that they are also insured.

Small high value items such as jewellery, watches and silver are identified, removed from the property, and securely stored in safes at our secure location.

This service can also provide for single items or entire collections (i.e. Art).

Dawsons will securely store the client possessions until a decision is made regarding selling them at auction or distribution/return to beneficiaries.
